EDUCATION

ONTARIO TECH UNIVERSITY

Oshawa, ON

Bachelor of Science (Honours) in Computer Science Co-op

Expected May 2028

Specialization: Software Development • Minor: Mathematics

Cumulative GPA: 4.10/4.30 • Presidents List (4x) • In-Course & Entrance Scholarships

Relevant Coursework: Data Structures, Software Design, Software Systems, Computer Architecture, Scientific Data Analysis

WORK EXPERIENCE

BRAVELLA HEALTH

Toronto, ON

Data Science & AI Development Intern

Sep 2025 – Sep 2026

- Developed and deployed a custom Qwen-3 14B LLM inference endpoint on SageMaker AI with a G6 GPU, integrating a RAG pipeline using FAISS, which indexed over 10,000+ PubMed articles to power a production clinical AI application.
- Architected and maintained a full-stack cloud application on a Linux EC2 instance with an Angular frontend, Flask backend, and Nginx reverse proxy, delivering a clinical LLM platform utilized across 3+ clinics in Ontario.
- Managed and secured ML data pipelines via HTTPS/SSL-TLS and S3, while collaborating with an AWS IT Architect to optimize infrastructure through GPU and token-level tuning, reducing inference latency and costs by over 50%

MY VOICE CANADA ORGANIZATION

Mississauga, ON

Mobile App Developer and UI/UX Designer

Jul 2022 – Jul 2023

- Engineered and published an Android mobile application to the Google Play Store using Flutter and Dart, contributing to full-stack development, debugging, and version control via Android Studio, Git, and GitHub to deliver a production-ready user-validated application.
- Led the UI/UX design process in Figma and Miro, designing 5+ app screens translated from Agile sprint feedback into intuitive, user-centred interfaces while collaborating within a 10-member cross-provincial team that earned Best Team of the Year recognition.

FEATURED PROJECTS

CAR DEALERSHIP REVIEW PORTAL

[GitHub](#)

- Built a full-stack web portal for browsing dealerships and submitting sentiment-analyzed reviews, with role-based access for anonymous, authenticated, and admin users. Deployed across a Django-powered microservices architecture.

SPACEX LAUNCH PREDICTION TOOL

[GitHub](#)

- Built an end-to-end data science pipeline on SpaceX launch data, from REST API collection, web scraping, and SQL-based EDA to training four ML classifiers with GridSearchCV, achieving 84% accuracy in predicting launch success.

PORTFOLIO WEBSITE

[Portfolio](#)

- Designed and deployed a fully responsive personal portfolio featuring scroll-triggered animations, a typewriter effect, and an integrated contact form with client-side validation. Built with HTML5, CSS3, JavaScript (ES6+), and GitHub Pages.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C/C++, SQL, Java, Dart, R, HTML, CSS

Tools & Frameworks: AWS, Git/GitHub, Docker, Kubernetes, Flutter, Django, Angular, React.js, Node.js, Flask, Scikit-Learn

Certifications: IBM Full Stack Software Developer (2025) • IBM Data Science (2025) • Google Cybersecurity (2025)

Spoken Languages: English (Fluent) • French (A2; DELF Certified) • Urdu (Intermediate)
