EDUCATION

ONTARIO TECH UNIVERSITY

Oshawa, ON

Bachelor of Science (Honours) in Computer Science Co-op

Expected May 2028

Specialization: Software Development • Minor: Mathematics

Cumulative GPA: 4.10/4.30 • Presidents List (4x) • In-Course & Entrance Scholarships

Relevant Coursework: Data Structures, Software Design, Software Systems, Computer Architecture, Scientific Data Analysis

WORK EXPERIENCE

BRAVELLA HEALTH

Toronto, ON

Data Science & AI Development Intern (Co-op)

Sep 2025 – Sep 2026

- Engineered and deployed a Qwen-3 14B LLM inference endpoint on SageMaker using GPU infrastructure, integrating a FAISS-powered RAG pipeline indexing 10,000+ medical knowledge sources to support a clinical AI assistant platform.
- Architected and maintained a full-stack cloud application on a Linux EC2 instance with an Angular + Capacitor frontend, Flask backend, and Nginx reverse proxy, enabling desktop and iOS access across 3+ clinics in Ontario.
- Managed and secured ML data pipelines via HTTPS/SSL-TLS and S3 encryption while collaborating with an AWS IT Architect to optimize GPU infrastructure and token-level inference, reducing latency and cloud costs by over 50%.

MY VOICE CANADA ORGANIZATION

Mississauga, ON

Mobile App Developer & UI/UX Designer

Jul 2022 – Jul 2023

- Developed and published an Android mobile application to the Google Play Store using Flutter and Dart, contributing to full-stack development, debugging, testing, and version control via Android Studio, Git, and GitHub to deliver a production-ready, user-validated application.
- Led the UI/UX design process in Figma and Miro, designing 5+ application screens and translating Agile sprint feedback into intuitive user-centred interfaces while collaborating within a 10-member cross-provincial team recognized as Best Team of the Year.

RELEVANT PROJECTS

PORTFOLIO WEBSITE

[Portfolio](#)

- Designed a fully responsive portfolio featuring a Three.js WebGL particle field, 3D tilt cards, magnetic interactions, a typed terminal, and client-side form handling using HTML5, CSS3, and JavaScript (ES6+); deployed via GitHub Pages.

CAR DEALERSHIP REVIEW PORTAL

[GitHub](#)

- Built a full-stack web portal for browsing dealerships and submitting sentiment-analyzed reviews, with role-based access for anonymous, authenticated, and admin users; deployed across a Django-powered microservices architecture.

SPACEX LAUNCH PREDICTION TOOL

[GitHub](#)

- Implemented an end-to-end data science pipeline on SpaceX launch data, from REST API collection, web scraping, and SQL-based EDA to training four ML classifiers with GridSearchCV, achieving 84% accuracy in predicting launch success.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, Java, C/C++, SQL, Dart, HTML, CSS, R

Tools & Frameworks: AWS, Git/GitHub, Docker, Angular, Flask, Nginx, SQLite, React.js, Node.js, PyTorch, Flutter, Django

Certifications: IBM Full Stack Software Developer (2025) • IBM Data Science (2025) • Google Cybersecurity (2025)

Spoken Languages: English (Fluent) • French (A2; DELF Certified) • Urdu (Intermediate)
