EDUCATION

ONTARIO TECH UNIVERSITY

Oshawa, ON

Bachelor of Science (Honours) in Computer Science Co-op

Expected May 2028

Specialization: Software Development • Minor: Mathematics

Cumulative GPA: 4.10/4.30 • Presidents List (4x) • In-Course & Entrance Scholarships

Relevant Coursework: Data Structures, Software Design, Software Systems, Computer Architecture, Scientific Data Analysis

WORK EXPERIENCE

BRAVELLA HEALTH

Toronto, ON

Data Science & AI Development Intern (Co-op)

Sep 2025 – Sep 2026

- Engineered and deployed a Qwen-3 14B LLM inference endpoint on SageMaker using GPU infrastructure, integrating a FAISS-powered RAG pipeline indexing 10,000+ medical knowledge sources to support a clinical AI assistant platform.
- Architected and maintained a full-stack cloud application on a Linux EC2 instance with an Angular + Capacitor frontend, Flask backend, and Nginx reverse proxy, enabling desktop and iOS access across 3+ clinics in Ontario.
- Managed and secured ML data pipelines via HTTPS/SSL-TLS and API Gateway while collaborating with an AWS IT Architect to optimize GPU infrastructure and token-level inference, reducing latency and cloud costs by over 50%.

MY VOICE CANADA ORGANIZATION

Mississauga, ON

Mobile App Developer & UI/UX Designer

Jul 2022 – Jul 2023

- Developed and published an Android app using Flutter, Dart, Android Studio, Firebase Authentication, and REST APIs, contributing across full-stack development, debugging, and Git-based version control to deliver a production-ready release on the Google Play Store.
- Led the design of 5+ user interfaces in Figma and Miro while collaborating within a 10-member Agile team, translating sprint feedback into intuitive user experiences for an award-winning project recognized as Best Team of the Year.

RELEVANT PROJECTS

LLM-POWERED AI CHATBOT

[GitHub](#)

- Engineered a full-stack AI chatbot using Node.js, Express.js, JavaScript, HTML, and CSS, integrating OpenAI's GPT API with real-time message routing and dynamic response handling to enable intelligent natural-language interactions.

CAR DEALERSHIP REVIEW PORTAL

[GitHub](#)

- Built a full-stack dealership review platform using Django, React, Node.js, and MongoDB microservices, implementing role-based authentication, IBM Watson NLP sentiment analysis, Docker containerization, and Kubernetes deployment on IBM Cloud.

SPACEX LAUNCH PREDICTION TOOL

[GitHub](#)

- Developed an end-to-end machine learning pipeline using SpaceX launch data, combining REST APIs, web scraping, SQL-based exploratory analysis, and four GridSearchCV-optimized classifiers to achieve 84% launch prediction accuracy.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, Java, C/C++, SQL, Dart, HTML, CSS, R

Tools & Frameworks: AWS, Git/GitHub, Docker, Angular, Flask, Nginx, SQLite, React.js, Node.js, PyTorch, Flutter, Django

Certifications: IBM Full Stack Software Developer (2025) • IBM Data Science (2025) • Google Cybersecurity (2025)

Spoken Languages: English (Fluent) • French (A2; DELF Certified) • Urdu (Intermediate)
